Video Editing and Passion Projects

CLIENT: WEB REACTIONISTS

I edit movies, tv shows, game clips and other videos to create gifs for use on message boards and social media comment sections.

A lot of influencers and internet personalities look for interesting media clips to express a thought, feeling or emotion.

I create such gifs and/or "reaction" content such as this one from the movie The Five Heartbeats. A "reaction gif" saying "Join the party" or "See how I feel?"

Software Workarounds

CLIENT: ONLINE GAMERS

The next series of links will show you

- 1: A script that reveals how to help PC gamers translate Playstation 4/5 key characters into their symbolic form in PC chat.
- 2: A simple code I created to formulate the cost of a gallon gas per mile. (something relevant today)
- 3: A slide show demonstrating my use of Java script, CSS and embedded images.
